PROJECTS

STORECOPYWRITER
PHP, Laravel, Shopify, MySQL, JavaScript, Bootstrap, Ajax
ROLE : Admin, Customers, User

STORECOPYWRITER is a web application integrated with a Shopify embedded app. It allows customers to connect their Shopify stores and leverage an AI-powered content generation tool to create and update product and collection content seamlessly.

Responsibility
- Developed and maintained modules for Admin, Customer, and User functionalities.
- Integrated Stripe payment gateway for user subscriptions and Shopify billing API for store-connected customers.
- Implemented SpyFu API to retrieve competitive intelligence data as per project requirements.
- Integrated Shopify APIs to manage product and collection data dynamically.
- Configured cron jobs to automate bulk content generation for products and collections, ensuring regularly updated storefronts.
- Integrated ChatGPT API to generate SEO-optimized and engaging content for Shopify products and collections.

YOUR CHILD'S HEALTH BOOK
PHP, Laravel, MySQL, JavaScript, Bootstrap, Ajax
ROLE : Admin, User

Built the backend and admin panel for a child health tracking app using Laravel. Developed secure APIs, user authentication, file storage, and real-time sync with the mobile app. Enabled full CRUD functionality through the admin dashboard.

Responsibility
- Developed a responsive admin panel to manage admin and user modules.
- Created modules for Terms & Conditions, Privacy Policy, and dynamic content updates.
- Handled file uploads (images and PDFs) using Spatie MediaLibrary.
- Developed all REST API endpoints for integration with the Android application.

VIRTUAL CEMETERY PLATFORM
PHP, Laravel, MySQL, JavaScript, Bootstrap, Ajax
ROLE: Full Stack Developer & Team Lead – Admin, Client & Contractor

Developed and maintained the full stack of a virtual cemetery platform enabling digital memorial creation, service ordering, and user interaction. Built secure APIs, dynamic web interfaces, and multi-role functionality for clients, contractors, and administrators.

Responsibility
- Designed and implemented RESTful APIs to support both the client-facing mobile application and the contractor module, enabling functionalities such as deceased profile creation, virtual candle lighting, prayer purchases, and service ordering.
- Created a fully functional admin panel for content moderation, user management, order tracking, and service configuration.
- Implemented payment gateway integration for virtual offerings and service purchases (e.g., flower placement, tombstone cleaning).
- Integrated Firebase Cloud Messaging (FCM) to deliver real-time push notifications for order updates and system alerts across both web and mobile platforms.
- Implemented a secure and scalable multi-role user system (Client, Contractor, Administrator) to support various workflows and permissions.
