PROFESSIONAL SUMMARY

I am a passionate Full Stack Web Developer with 5+ years of experience crafting dynamic and responsive websites. I specialize in both front-end and back-end development using HTML, CSS, Bootstrap, JavaScript, jQuery, Laravel, and PHP. I enjoy working on projects that involve building clean, well-structured code and have good experience with RESTful API development, payment gateway integrations, and working closely with clients to understand their requirements and deliver on time. I am comfortable working individually as well as within a team.

TECHNICAL SKILLS

Back-End: PHP 8.x, Laravel 9/10, RESTful APIs, MVC, OOP, AJAX

Front-End: HTML5, CSS3, Bootstrap 5, Tailwind CSS, JavaScript, jQuery

Database: MySQL

Integrations: Stripe, PayPal, Shopify Billing API, ChatGPT API, SpyFu API, Firebase FCM

Tools: Git, GitHub, Postman, PhpStorm, MySQL Workbench, TCPDF, DOMPDF, Spatie MediaLibrary

Other: Cron Jobs, SMTP Mailer, Shopify Embedded Apps, eCommerce Platforms

WORK EXPERIENCE

PHP Laravel Developer

BajarangiSoft | Mar 2020 – Present | Bangalore, India

- Worked on 30+ full-stack web applications using Laravel and PHP, taking care of both front-end and back-end development across multiple projects.
- Built RESTful APIs for Android and iOS mobile apps, making sure the integrations worked properly and were easy to maintain.
- Developed full-featured eCommerce platforms with shopping cart, product management, and order tracking modules as per client needs.
- Integrated Stripe, PayPal, Shopify Billing API, and Laravel Cashier for handling payments and subscriptions across multiple projects.
- Worked on Shopify embedded app development with custom Laravel integrations to improve store functionality and support AI-based content generation.
- Implemented Firebase Cloud Messaging (FCM) to send real-time push notifications on both web and mobile platforms.
- Implemented multi-role user systems with separate access levels and permission controls.
- Used TCPDF and DOMPDF to generate PDF reports, invoices, and documents as per project requirements.
- Set up cron jobs for automating bulk data tasks and scheduled content updates.
- Used SMTP mailer to send transactional and notification emails to users.
- Handled client requirement gathering, project planning, and regular communication throughout the development process.
- Worked with Postman for API testing and documentation, and used Git for version control.

KEY PROJECTS

LAVISH FINE JEWELLERY

PHP · Laravel · MySQL · JavaScript · Bootstrap · Ajax

Role: Full Stack Developer – Admin & Frontend

Lavish Fine Jewellery is a premium jewellery eCommerce web application built to deliver a luxury shopping experience online. The platform is designed with a focus on visual appeal, smooth user interaction, and seamless store management. It supports both customer-facing journeys and internal admin operations, making it a complete and scalable jewellery business solution.

- Developed a full-stack fine jewellery eCommerce platform covering product catalogue management, collections, and dynamic content pages for rings, necklaces, bracelets, and earrings.
- Built and maintained the admin backend for product management, category configuration, inventory updates, and order management modules.
- Developed the customer-facing frontend UI with dynamic, responsive pages for product listings, product detail views, and collection browsing using Bootstrap and Ajax.

- Implemented dynamic content management allowing admins to update banners, featured collections, and promotional content without code changes.
- Built an interactive Ring Builder module allowing users to customize rings by selecting metal type, gemstone, shape, and size with dynamic price updates.
- Implemented a full shopping cart system with add-to-cart, quantity management, order placement, and order tracking for end-to-end purchase flow.

STORECOPYWRITER

PHP · Laravel · Shopify · MySQL · JavaScript · Bootstrap · Ajax

Role: Full Stack Developer – Admin & Customers

STORECOPYWRITER is a Shopify-integrated web application that enables customers to connect their Shopify stores and leverage an AI-powered content generation tool. The platform is built to automate and streamline product and collection content creation, combining a robust Laravel backend with a seamless Shopify embedded app experience.

- Developed and maintained full-stack modules for Admin and Customer functionalities across both backend and frontend.
- Integrated Stripe payment gateway for user subscriptions and Shopify Billing API for store-connected customers.
- Implemented SpyFu API to retrieve competitive intelligence data as per project requirements.
- Integrated Shopify APIs to manage product and collection data dynamically from the frontend.
- Configured cron jobs to automate bulk content generation for products and collections, ensuring regularly updated storefronts.
- Integrated ChatGPT API to generate SEO-optimized and engaging content for Shopify products and collections.
- Worked on Shopify embedded app development with custom Laravel integrations to support AI-based content workflows on the frontend.

VIRTUAL CEMETERY PLATFORM

PHP · Laravel · MySQL · JavaScript · Bootstrap · Ajax

Role: Full Stack Developer & Team Lead – Admin, Client & Contractor

Virtual Cemetery Platform is a full-stack digital memorial web application that enables families to honour and remember their loved ones through a meaningful online experience. Users can light virtual candles, offer prayers, order grave cleaning and maintenance services, and purchase tribute offerings — all through a seamless digital interface. The platform connects clients, contractors, and administrators through a structured multi-role system, making memorial care and service management accessible from anywhere.

- Developed end-to-end backend and frontend modules covering deceased profile management, virtual tribute features, and contractor service workflows.
- Built RESTful APIs for the client-facing mobile app and contractor module, covering deceased profile creation, virtual candle lighting, prayer purchases, and service ordering.
- Created a fully functional admin panel for content moderation, user management, order tracking, and service configuration.
- Implemented payment gateway for virtual offerings and service purchases.
- Integrated Firebase Cloud Messaging (FCM) for real-time push notifications for order updates across web and mobile.
- Built a multi-role user system for Client, Contractor, and Administrator with separate workflows and permissions.
